## PROFESSIONAL SUMMARY

Full Stack Engineer with hands-on experience developing scalable web applications using Next.js, React.js, JavaScript, TypeScript, Django, and Django REST Framework. Strong expertise in backend development, RESTful APIs, JWT Authentication, API security, and relational databases CockroachDB, PostgreSQL. Skilled in Git, GitHub, Postman, system design fundamentals, and clean architecture.

## TECHNICAL SKILLS

- |                |                      |                     |                              |
|----------------|----------------------|---------------------|------------------------------|
| • Next.js      | • React.js           | • TypeScript        | • Tailwind CSS               |
| • HTML/CSS     | • Python             | • Django            | • Django REST Framework      |
| • RESTful APIs | • JWT Authentication | • API Security      | • Prompt Engineering         |
| • PostgreSQL   | • MySQL              | • CockroachDB       | • OpenAI APIs                |
| • RAG Concepts | • Vector Databases   | • Git               | • SaaS Development           |
| • Docker       | • CI/CD Basics       | • Vercel Deployment | • System Design Fundamentals |

## PROFESSIONAL EXPERIENCE

**GTPL – Software Engineer**  
Bangalore, Karnataka, India

12/2023 – Present

- Developed and maintained scalable frontend modules using Next.js and React.js, improving dashboard responsiveness and reducing page load times by ~30%.
- Built and optimized RESTful APIs using Django REST Framework, improving backend workflow efficiency and reducing average API response time by ~25% across compliance modules.
- Implemented JWT authentication and RBAC systems for three user roles, fortifying application security and access management, and processing 75,000+ authentication requests daily with zero downtime.
- Integrated React/Next.js frontend systems with PostgreSQL and MySQL databases, improving data retrieval performance and increasing API response consistency by ~30%.
- Collaborated with cross-functional teams in agile sprint cycles, helping deliver production-ready features ~20% faster while reducing recurring bug issues.
- Designed scalable backend workflows for audit trails and compliance reporting, reducing repetitive manual processes by ~40% and improving maintainability.

## PROJECTS

**AI Personal Finance Assistant (Personal Project)**

Live Demo: [ai-finance-assistant-phi.vercel.app](https://ai-finance-assistant-phi.vercel.app) | GitHub: [github.com/souviknath18/ai-finance-assistant](https://github.com/souviknath18/ai-finance-assistant)

- Built and deployed an AI-powered personal finance platform using Next.js, TypeScript, Django REST Framework, and PostgreSQL, enabling users to upload and analyze financial documents through a unified dashboard.
- Designed and implemented secure JWT authentication and RESTful APIs, ensuring protected access to financial data and seamless frontend-backend integration.
- Developed automated bank statement parsing and transaction processing pipelines, extracting, normalizing, and categorizing financial records from PDF and CSV documents with high accuracy.
- Implemented AI-driven expense categorization and financial insights using OpenAI embeddings, semantic search, and Retrieval-Augmented Generation (RAG), enabling natural language querying of transaction history.
- Engineered vector search and transaction retrieval workflows using embeddings and similarity search, improving contextual accuracy for AI-generated financial recommendations.

## EDUCATION

**Bachelor of Technology** – Electronics and Communication Engineering, 09/2021  
Assam University Silchar, Assam
